## FOREWORD

The year 1949 saw the sorely-needed expanded Mental Health Program inaugurated by the Honorable James H. Duff, Governor of the Commonwealth of Pennsylvania move into high gear and progress at a most impressive tempo.

The vastness of the over-all program - embracing a seemingly unbelievable volume of detail - is almost impossible to fully comprehend. Its scope and the good it will accomplish for thousands of members of society who heretofore could not be cared for, are so extensive that one only need visit any one of our 17 mental institutions to witness this transformation.

To the layman statistics are dull, boring figures. Yet the statistics contained in this, the Fifteenth Annual Statistical Report, pointedly and with emphasis show precisely what is being accomplished in Pennsylvania's new Mental Health Program.

Our hospital population variances, types of illness, types of treatment, and degree of progress of treatment are only a few of the important factors contained in this report.

Governor Duff has set the pace for the great construction program - yet importantly he has quite properly insisted that provision be made for equipment and personnel to man these new buildings and structures, emphasizing the fullness of the program.

Pennsylvania is once more assuming the leadership in the Nation's mental health picture. The most modern methods of treatment and rehabilitation are now being employed. Scientific advancement accomplished during the past few years is being utilized to the fullest degree.

It is interesting to note that approximately 37,000 inmates populate Pennsylvania's 17 mental hospitals.

Data compiled indicates that a ten State-owned General Hospitals last year, a total of 43,668 patients were admitted. For these patients in need, a total of 521,000 laboratory and x-ray examinations were made - or 11.9 tests per patient.

In addition to Pennsylvania's 17 hospitals for mentally ill there are three for mental defectives and one for epileptics.

An institute for training, teaching and research - the Western State Psychiatric Institute at Pittsburgh - left the State jurisdictional fold during the year when it was turned over to the University of Pittsburgh.

Yet similarly during this same year, plans were drawn up for a like institution in the east - The Eastern State Psychiatric Institute at Philadelphia - which will serve the same purpose as the Western Institute.

In this the post-war era, the mental health program is assuming more and more importance. Its need was never greater than at the present time. Indications are that this need will increase from year to year.

It is essential that society meet its obligations. This we cannot escape. It is more urgent today than ever before. Just how

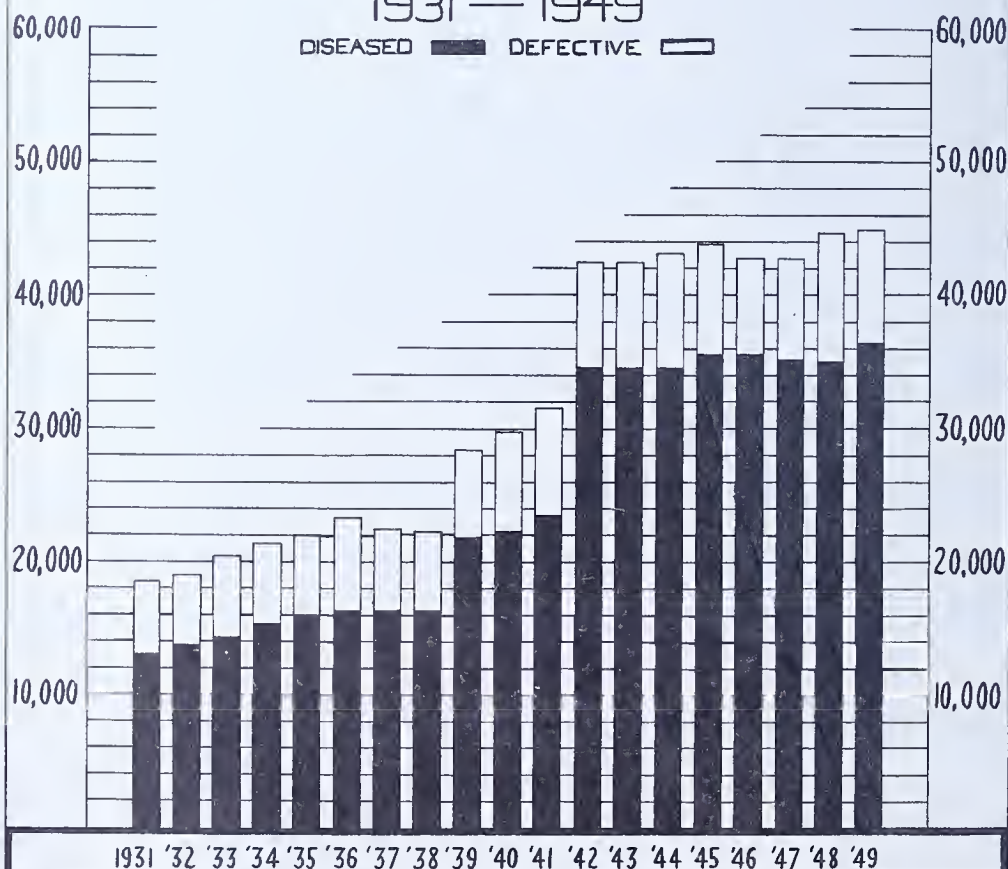

Pennsylvania is meeting this problem can well be gleaned from the work being accomplished, as shown by this Fifteenth Annual Statistical Report.

\* No capacity figures are given for Western State Psychiatric Institute and Clinic because of the type and nature of the institution.

## BUREAU OF MENTAL HEALTH

Submitted herewith is the fifteenth of successive annual reports dealing with selected statistics obtained from the Commonwealth's mental institutions. The period covered is the fiscal year ending May 31, 1949.

The number of State-owned and State-operated mental institutions are twenty-two which are divided into the following categories:-

Seventeen for the mentally ill, three for the mentally defective, one for the epileptic, and one institute for teaching, training, and research. The Western State Psychiatric Institute and Clinic appears for the last time, since on September 1, 1949, it was transferred to the University of Pittsburgh for control and operation. These statistics represent the greater part of psychiatric services in this Commonwealth since all public institutions are now state facilities.

The full impact of our extensive rehabilitation and construction program is not yet in evidence in this report which indicates only a minor rise in institutional capacity. However, the problems of deferred maintenance have been largely resolved and our physical plants are geared for relief of over-crowding and expansion. The necessary first stage of our total mental health program is being superseded by increase of accommodations so that capacities and related figures must be revised every few months. This second stage of our program will con-

tinue for several more years until the addition of some 11,000 new beds for the mentally ill alone is acquired.

It will be noted that admissions have definitely increased. This does not imply a greater incidence in mental illness or defect but merely that some increase of available accommodations plus a greater turnover of patients have made possible a wider service to meet community needs. Former restrictions are gradually loosening up. The few mental hospitals that still have waiting lists for non-urgent cases are able to schedule admissions within a few weeks.

The old-age group will obviously increase. Patients sixty years and over still comprise 31% of first admissions. The seniles and sclerotics have edged up from 24.4% to 24.7% of first admissions in the past year. We are proceeding to include geriatrics units in all new construction. However, the care of the non-psychotic senile is still unanswered and legislation clarifying such responsibilities must be forthcoming. There is already an unfortunate trend to commit mildly incompetent aged persons as definite mental cases for sake of expediency in providing custodial nursing care.

There is no doubt that public institutional care and treatment of mental patients in Pennsylvania has received a tremendous uplift due to progressive leadership supported by universal public sentiment. At the present time the momentum forward has been firmly established and a comparable renaissance is in process which gives us full confidence in meeting the complicated secondary problems still along the way. With the necessary first things being attended to first, we are gradually able to give thought and shift our emphasis to a program of prevention and early treatment. Thus the roots of mental illness will command our

increasing attention. Even though basic research must yet be done to reduce the backlog of the long continued care type of patients, we feel the "dead-end" concept of a mental institution can eventually be dissipated. The statistical evidence in the years to come will, we trust, support our faith that progress is now inexorable.

FIFTEENTH  
ANNUAL STATISTICAL  
REPORT

*of the*

Department of Welfare

WILLIAM C. BROWN

*Secretary*

1949

## FOREWORD

This Annual Statistical Report for the period June 1, 1948 to May 31, 1949 illustrates to some degree the trend of penal affairs in Pennsylvania during the year.

It is noteworthy to call attention to the fact that both crime and juvenile delinquency in these post-war years have steadily increased. In this connection it is worth calling attention to the fact that during the year our already overcrowded State penal institutions increased their population by 293.

One of the fundamental principles of Pennsylvania's penal system is the stressing of rehabilitation over simple custodial care in order that those in our penal institutions may leave therefrom, prepared in part at least, to forge their way satisfactorily in the society to which they return.

In this connection the Prison Industries program of the Department of Welfare plays an important part in our rehabilitative plan.

To illustrate this point, it is interesting to note that the number of inmates trained through Prison Industries in 1945-46 numbered 1096. During the year covered by this Statistical Report this number had increased to 1265.

Trends similar to this in the many and varied phases of Pennsylvania's penal program may be noted by comparison of the statistics contained in this Report.

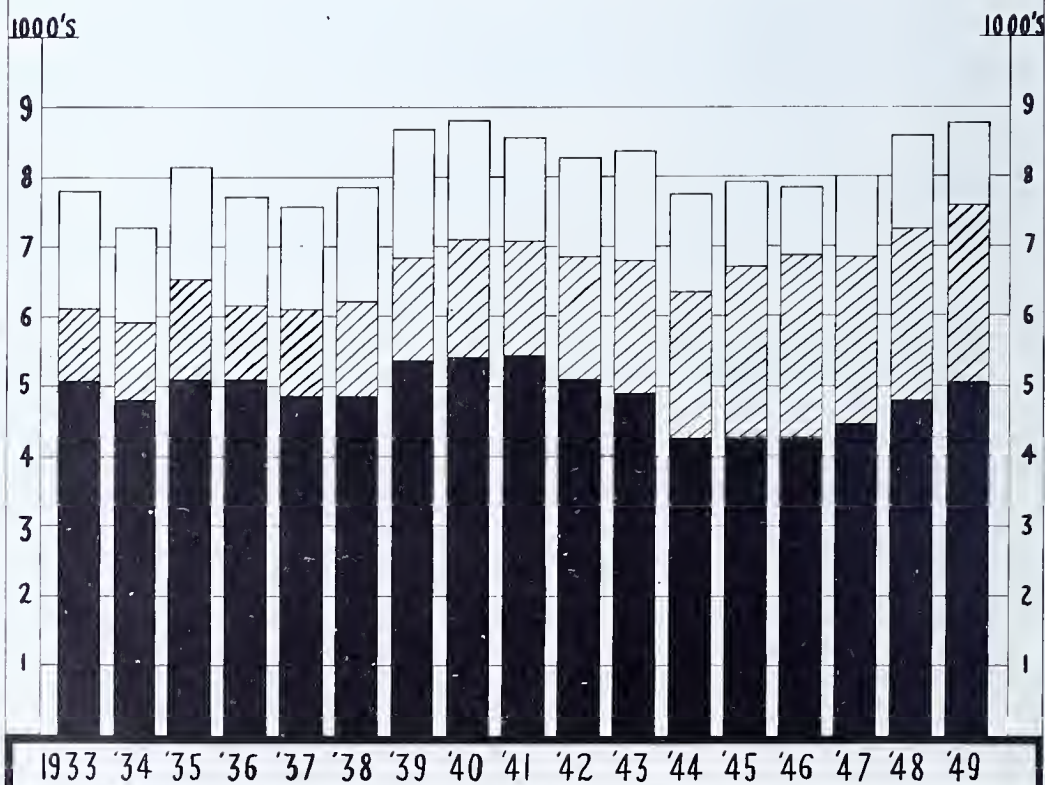

Department of Welfare  
William C. Brown  
Secretary

# STATE INSTITUTIONS PENAL AND CORRECTIONAL POPULATION MAY, 31 1933 — 1949

PENITENTIARIES ■  
CORRECTIONAL SCHOOLS □ INDUSTRIAL SCHOOLS ▨

## BUREAU OF CORRECTIONS

This Bureau within the Department of Welfare is responsible for the supervision, inspection and regulations of all penal and correctional institutions throughout the Commonwealth of Pennsylvania.

The Bureau is governed by Laws and Acts of General Assembly, the Administrative Code and standards prescribed by the Secretary of Welfare and the Welfare Commission, covering the physical, maintenance and administrative policies in the institutions. The primary duty of the Bureau is to visit and inspect, at least once each year, all State-owned and State-supervised penal and correctional institutions; to insure just and humane care and treatment of all persons confined therein; Also, it is the Bureau's duty to supervise the transfer of inmates from one State penal and correctional institution to any other State penal or correctional institution; to formulate and put into operation plans for the classification of institutions, and to formulate and put into operation a program for the classification of inmates so that the inmates may be grouped in those institutions which have the proper facilities.

Each State-owned institution has a classification board and it determines the type of confinement best suited to the individual. Careful study is made as to the training for which he is adapted, the educational and vocational training necessary to equip him for the future; the medical and surgical services he may require; and the psychological and psychiatric treatment necessary. The spiritual need of those incarcerated is administered by the Chaplains in a well-organized

program. Balanced diets, proper housing, exercise, hobbies, libraries, recreation and entertainment are afforded the inmates; also, an effort is made to afford suitable work through employment in prison shops and farms. All these efforts toward individualization are employed to assist the offender in rehabilitating himself so that when he returns to society he is fortified from further criminal tendency.

The institutions inspected and supervised by the Bureau of Corrections are as follows: Eastern State Penitentiary, Philadelphia; New Eastern State Penitentiary, Graterford; Western State Penitentiary, Pittsburgh; New Western State Penitentiary, Bellefonte; State Industrial Home for Women, Muney; Pennsylvania Industrial School, Camp Hill; Pennsylvania Institution for Defective Delinquents, Huntingdon; Pennsylvania Training School, Morganza; Allegheny County Workhouse, Blawnox; House of Correction, Philadelphia; 68 county prisons and 441 city, borough and township lock-ups.

Crime in the state is steadily increasing and its prevention and solution is the problem of all its citizens. The population in our State-owned penal institutions has increased 293 during the period from June 1, 1948 to May 1, 1949 and the population in the county prisons increased 1396 during the same period.

We are hopeful that in the near future that the State will be able to enlarge and create a correctional program which will meet the increasing demands for the treatment of crime and delinquency.

Department of Welfare  
Bureau of Corrections  
Fred W. Brady  
Director

COMMONWEALTH OF PENNSYLVANIA

FIFTEENTH  
ANNUAL STATISTICAL  
REPORT

*of the*

Department of Welfare

*WILLIAM C. BROWN*

*Secretary*

1949

## INTRODUCTION

The value of statistics is readily understandable from the many and various uses to which they are applied.

However, to be of proper service, their accuracy should be unquestionable. For this accuracy it is necessary to depend on many and various agencies and sources. We take this opportunity to thank those outside agencies and sources which have cooperated in furnishing this information.

The Fifteenth Annual Statistical Report is issued in three sections. The first section deals with Mental Institutions, the second section deals with Penal and Correctional Institutions. In this, the third section, will be found tables of statistics depicting activities of the Bureau of Institutional Management, the Bureau of Community Work and the State Council for the Blind, covering the period from June 1, 1948 to May 31, 1949. The Bureau of Institutional Management serves all State-owned Institutions supervised by the Department of Welfare and also acts in an advisory capacity to State-aided and tax supported institutions. Consequently, its functions are inter-related with all Bureaus of the Department of Welfare.

The Bureau of Community Work is concerned with problems involving the care of both children and adults. This activity covers both agencies and institutions as well as general hospitals, licensed nursing and convalescent homes and homes for the aged. The Federal-aided hospital construction Program is likewise administered by this Bureau.

Facts supplied by the Council for the Blind, which is an administrative board in the Department of Welfare, reports some of the functions of

that group.

We trust the information contained in this bulletin will help various groups to better understand these three services of the Department of welfare.

Department of Welfare

William C. Brown

Secretary

## BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and forty State-owned Institutions for developing and supervising a program providing food, laundry, steam, light, water, sewage disposal, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, laundry, hospital, farm and engineering service records are issued to institutions.

### Dietary

The daily Basic Ration has been continued as the minimum requirement for an adequate low cost diet. The table showing the ration and the average daily consumption per person per day in 16 of the mental hospitals and schools for mental defectives shows the variation in the ability of the institutions in meeting these minimum requirements. A slight average increase in food consumption has been accomplished during 1948-49 over that of 1947-48.

The food costs of 1948-49 have only slightly increased over that of 1947-48. Labor costs have also slightly increased. Necessary salary increases, additional employees to inaugurate a straight-shift eight hour day are some of the reasons for increased labor costs. An increase in the unit prices of 7 of the 15 major commodities was noted in May 1949 as compared with May 1948. They were milk, eggs, potatoes, apples, dried beans, dried fruit and coffee. A decrease in the price of beef, butter, cheese, flour, sugar, leafy and root vegetables, and tomatoes was also noted.

The institutional food needs are met wholly or partially by production of milk, meat, eggs, poultry and vegetables on the institutional farms. It is urged that purchases supplement that produced in order to insure adequacy the year around. Institutions with canning facilities have continued their food preservation program. An equivalent of 671,421 #10 cans of fruits and vegetables were processed in 1948; 659,915 in 1947; 283,544 in 1946. These figures include that canned and frozen at the penal-correctional institutions, as well as the mental hospital group, but does not include the amounts processed by the Prison Industries for sale to other tax supported institutions. This program has helped to distribute produced food to a yearly consumption basis rather than a seasonal basis; it has also assisted in feeding, as well as possible, on the limited food budgets available.

#### Farms

At 27 Mental and Penal Institutions, land totaling 36,260 acres is controlled. Of this total, 35,147 acres are owned by the Commonwealth and 1,113 acres are leased for institutions. Control of this land provides a degree of isolation highly desirable alike to community and institution. Utilization of land provides wholesome occupation in barns, fields and gardens for approximately 2200 patients or inmates. This patient or inmate occupation is of necessity quite seasonal so that at certain times the number so occupied reaches much higher figures. Approximately, patient or inmate occupation in farm enterprises is shown on the table headed "Acreage, Number of Patients Occupied on Farms". The utilization of land is shown on the table headed "Institutional Land-Approximate Use in Acres". Definite plans are developed for the use of all land in order that the maximum contribution may be made to the over-all institutional program. Such plans are developed

annually in conference of institutional administrators with farm managers, dietitians, stewards and representatives of the Department of Welfare. Food production has long been an important factor in institutional economy. Indeed, during recent years of scarcity and high prices, institutions would frequently have lacked essential foods were it not for their own production. In planning land use, priority is given to vegetables and potatoes, since these products have such a large place in the institutional dietary.

Dairy cattle, swine and poultry are maintained at institutions having facilities for handling them. These livestock enterprises contribute part or all the milk, pork and eggs used by the respective institutions. Beef cattle are fattened for institutional use at such institutions as have surplus pasture or roughage above dairy requirements.

Efficiency in production is sought through close attention to management practices, through use of improved crop strains and better bred livestock.

All farm planning is correlated with institutional food needs and optimum patient or inmate occupations.

Field crops to support livestock utilize the tillable acreage not required for vegetables, potatoes and orchards. Land used at institutions is shown on the table headed "Institutional Land-Approximate Use in Acres". It will be noted that land not suited for cultivation is utilized as pasture or woodland. All land management is planned, not only for maximum production but for conservation and development of soil resources.

Efficiency and production in major field crops is shown on the table headed "Crop Acreage and Total Yield". Vegetable acreage and production for the production season 1948, is shown on the table headed "Vegetable, Acreage and Production". Milk production for the calendar year

1948 is shown by institutions on the table labeled "Institution Milk Production by Months". Institutional ownership of livestock as of May 31, 1949 is shown on the table headed "Institutional Livestock Census". Livestock production and efficiency for the fiscal year June 1, 1948 to May 31, 1949, is indicated on table headed "Institutional Livestock Production". Paid employment and per capita per day costs of farm operation at institutions is indicated on the table headed "Agricultural Activity, Paid Employees and Per Capita Per Day Costs". Progress in agricultural efficiency over a nineteen year period is demonstrated by the final table captioned "Agricultural Efficiency, State-owned Institutions".

#### Laundry

The yearly summary of institutional laundry data gives average population, pounds of soiled goods, employees--paid and others, working cost and gross cost per pound of soiled goods. The population of institutions receiving laundry service, 61,515, is the highest on record. This figure reflects gradual increase in institutional population.

The total pounds of soiled goods, 52,697,830, is also the highest on record and reflects the gradual increase in population.

Washing costs are only slightly higher than in the past. Gross costs were .0126 per pound.

Patients and/or inmates employed in institutional laundries totaled 1,549, approximately the same as a year ago. Institutions must continue to depend on inmate or patient help to a large extent. The work opportunity provided is, however, considered of distinct value by institutional administrators.

#### Laundry Test Bundle

In the table showing Laundry Test Bundle Analysis, a comparison of

quality of performance is made between the first five test bundles run during 1935-36 and the 49th test bundle, processed in 1949. Marked over-all improvement in quality is evident. Whiteness retention averaged 5% higher in the last test bundle and for 27 institutions was rated at 100%. In the first five test bundles, no institution had such a rating. Soil removal averaged 28% higher in the last test bundle, which is more than a half better than average of the first five test bundles.

These test bundle analyses were made at the Ellen H. Richards Institute of the Pennsylvania State College. They contribute a part of the laundry supervisory service arranged through that agency and which services are made available to all State-owned institutions.

### Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of physical property. The table indicating Quantities Used and Costs of Furnishing Operating Services covers a volume of items and corresponding costs for basic maintenance materials and utilities. Coal constitutes the largest single item.

Coal costs for the year ending May 31, 1949 was approximately 9% above that for 1948. This cost was entirely due to higher coal prices as coal consumption for 1949 is approximately 6% less than that for 1948.

The increased cost of coal, and the increased consumption of electricity, fuel oil, and water therefore equals the total cost.

The over-all expenditures are about 9% above those of a year ago.

Electricity purchased is 10% above that for the year 1948 with 8% higher cost. This increase is accounted for by about 20% additional load

demand in new construction and the remainder to purchase electricity rather than replace existing generating equipment.

### Hospital Service

Analysis of Hospital Service at State-owned Medical and Surgical Hospitals are shown in the following tables:

Patients, Type of Service and Number  
Laboratory Analysis and X-Ray Examinations, Type and Number  
Clinics, Type and Attendance

The average daily population of the 10 Medical and Surgical Hospitals was 1194, a slight decrease over the previous year.

The table relating to Patients, Types of Service and Number show that there were 43,668 patients admitted in comparison to 43,489 last year.

The table on Laboratory Analysis and X-Ray Examinations reveals a total of 521,473 laboratory examinations, or 11.9 tests per patient. This number represents 54,306 more examinations than a year ago. There were 1754 electrocardiograms reported this year, a slight decrease over the previous year. Reports indicate an increase of 1412 blood transfusions, though administrations of blood plasma showed a decrease of 306.

X-Ray Examinations reported this year totaled 54,381, an increase of 915 over a year ago. Also, X-Ray Therapy treatments totaled 2,948, a slight increase over last year.

It will be noted in the Table on Clinics, Type and Attendance, the number of visits was 49,111, an increase of 369 over the previous year.

### Nursing Education

The table under Nursing Education in State-owned Hospitals shows that 110 students completed the three year course in Nursing in the four (4) Hospitals conducting Schools, compared with 143 of the previous year.

The number of students receiving Psychiatric Nursing Affiliation

was 1299, a decrease of 89 over the last report. However, 5 additional nursing schools are represented in these affiliations.

As will be noted in the table, the Senior Cadet Program has been continued in three State Mental Hospitals. This program was concluded September 1948.

The Harrisburg State Hospital maintains a course for Licensed Attendants. The number of students completing the course shows an increase.

A nurse on the staff of the Torrance State Hospital took advantage of the Fellowship, offered by the Department of Welfare, for one year of advanced study in Psychiatric nursing at the University of Pittsburgh and the Western State Psychiatric Institute and Clinic.

## BUREAU OF COMMUNITY WORK

In 1933, the Bureau of Community Work was established in the Department of Welfare to combine the services of the former Bureau of Assistance and Bureau of Children. Currently, the Bureau is composed of the following Divisions: Administrative, Family and Child Welfare, Rural Child Welfare, Homes and Hospitals, Hospital Construction, and Research and Statistics.

The Administrative Division has the overall administration of the Bureau, comprising some 150 employees and responsibility for supervision of approximately 1,138 institutions and agencies plus the Solicitation Act, the Non-profit Corporation Act, Interracial Problems, and Homes for the Aged.

The Solicitation Act was passed to protect merchants and citizens from unscrupulous agencies and persons, soliciting for supposedly charitable, benevolent, patriotic, and humane purposes.

The Non-profit Corporation Act (Section 212) provides a special procedure of responsibility for this Department in the incorporation of certain charitable and eleemosynary nonsectarian institutions and agencies. The office of Interracial Problems works in conjunction with citizen groups to foster interracial co-operation and serves as an agency to create better relations and understanding between various racial groups within Pennsylvania.

Under Homes for the Aged, this Division supervises 62 County Homes and 17 State-aided Homes and acts as Consultant on other Homes and problems connected with the aged.

The Division of Family and Child Welfare is charged with the supervision of 542 various child care institutions and agencies.

In addition to this, the Division is also responsible for the administration of several laws dealing with children. Particularly significant are the Juvenile Court Act, the County Institution District Act and the licensing laws for Infant and Child Boarding Homes. The Division also administers the Act requiring the consent of the Department and the filing of a \$1000 bond before any child may be placed in Pennsylvania from any other state.

The Division of Rural Child Welfare is one of the two Federal-aided programs in this Bureau and supplements the work of the Division of Family and Child Welfare by organizing child care programs in counties predominately rural and in areas of special need. These programs are developed in cooperation with the County Institution Districts to assist in giving care to the dependent and neglected children for whom they are responsible.

The Division of Homes and Hospitals licenses and supervises approximately 566 institutions of the following types: private nursing and convalescent homes; private maternity homes and hospitals and private hospitals which are operated for profit; inspects annually and supervises all hospitals receiving State-aid; inspects maternity departments of sectarian hospitals having such service and private hospitals operating under charters of the first class; inspects annually institutions for crippled children and preventoria, approves for payment quarterly financial requisitions of State-aided hospitals on the basis of adequacy of equipment and resident or intern employment.

The Division of Hospital Construction is the other Federal-aided program. This Division handles the administration of the newly organized Federal-aid program for hospital construction. Under this program, Pennsyl-

vania is slated for approximately \$9,000,000 annually.

The Division of Research and Statistics tabulates, assembles and disseminates statistical data obtained from the State-owned, State-aided, and State-supervised institutions. It also formulates statistical information for the various Bureaus and Divisions of the Department of Welfare. Included in its records are statistics on population, personnel, dietary reports, laundries, farms and dairies, engineering data, all of which is present for comparative study by the appropriate Division or Bureau.

The work of compiling this report was performed by the Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson. The organization and presentation of the material resulted from conferences and advice from the Bureaus described herein.

Department of Welfare  
Bureau of Community Work  
Ira J. Mills  
Director

# TRI-COUNTY CHILD GUIDANCE CENTER

At the Tri-County Child Guidance Center, A Unit within the Division of Rural Child Welfare, children who are in need of psychotherapy and/or psychiatric and psychological studies, because of emotional, educational or social maladjustment, receive service. Specifically, service is provided for any child in Pennsylvania who does not have access to any other child guidance service, when the child's attitudes and behavior have brought him into conflict with his family, school or community.

TABLE XXX

The above chart shows the number of children seen at the Center during the year 1948-1949 by age, sex and type of service received. Service to a child always involves service to the adult or adults who are responsible for him. In connection with the service shown in the above chart, there were 2446 interviews with children and parents or other adults.

These children came from the following counties: - Adams, Blair, Bradford, Cumberland, Dauphin, Elk, Franklin, Lebanon, Lycoming, Mifflin, Perry, Schuylkill, Tioga and York.

WHERE THE WELFARE DOLLARS GO

## COUNCIL FOR THE BLIND

During this year we were able to render service to 7,172 visually handicapped and blind Pennsylvanians at a cost of \$425,724.60. Services were rendered in 65 counties of the Commonwealth.

The per capita cost averaged \$59.36 for the year. A breakdown of section per capita cost for services rendered follows:

General Remedial Eye Care	\$ 90.40
Clinical Remedial Eye Care	2.90
Home Teaching	28.75
Rehabilitation	449.00

Department of Welfare

Council for the Blind
